I am a Full-Stack Developer with 6+ years of experience in the PHP and JavaScript/TypeScript ecosystems. I have extensive experience developing robust APIs and real-time systems that handle massive traffic spikes for large-scale projects. In my senior role, I specialize in designing secure FinTech and Retail solutions. I am passionate about guiding my team, ensuring code quality through reviews, and building systems that are both high-performing and easy to maintain.

SKILLS

- Languages: PHP, Javascript, Typescript, Go
- Frameworks: Laravel, Lumen, NestJS, ExpressJS, Fiber (Go), Vue.js, Nuxt.js, React.js, Next.js
- Databases: MySQL, PostgreSQL, Microsoft SQL Server, MongoDB, Redis
- Architecture: RESTful APIs, Microservices, Event-Driven Architecture, Apache Kafka
- Tools: GitHub, Docker, Git, Postman, Linux, Jenkins, Sourcetree, DBeaver, Navicat
- Soft Skill: Leadership & Mentoring, Team Collaboration, Growth Mindset & Continuous Learning

WORK EXPERIENCE

Senior Full-Stack Developer 06/2025 - Present
Clicknext, Inc
Bangkok, Thailand

- System Architecture & Design: Collaborated with BA/SA to design UX/UI and selected the technology stack (NestJS/Nuxt.js) focused on scalability and long-term maintainability.
- Technical Guidance: Guided the team on code structure, established coding standards, and performed code reviews to ensure system stability and ease of future updates.
- Database Design & Optimization: Designed database schemas for multiple projects and performed query optimization to improve data retrieval speed and system performance reducing latency by 30%.
- Loyalty & CMS Platform: Developed a NestJS-based backend and Nuxt.js frontend for point accumulation and content management, handling high-traffic peaks of 1,000+ requests per second.
- Financial Transaction System: Built the backend API for a mobile gold trading application, managing bank account linking and secure fund withdrawal processes.
- Data Migration & Auth Integration: Managed data migration for stock with over 10+ million rows of data and 10+ thousands user profiles, implemented Role-Based Access Control (RBAC), and integrated OAuth 2.0 for seamless app transitions.

Back-end Developer 06/2019 - 06/2025
Clicknext, Inc.
Bangkok, Thailand

- Government Lottery Microservices: Developed RESTful APIs using Laravel/Lumen and Nuxt.js for a lottery management system, supporting over 1,000 requests per second during draw results.
- Real-time Notifications: Built a high-volume notification system using Firebase Cloud Messaging (FCM) and Apache Kafka, successfully delivering over 100,000 alerts simultaneously.

WORK EXPERIENCE

Back-end Developer (Continued) 06/2019 - 06/2025
Clicknext, Inc.
Bangkok, Thailand

- Automation & Task Scheduling: Implemented Cron jobs to automate background tasks, including employee data synchronization and scheduled system notifications.
- Logistics Tracking Integration: Developed real-time tracking APIs (Laravel/Lumen) integrated with various third-party logistics providers.
- Regional Retail Promotion System: Developed a full-stack promotion and coupon management system (ExpressJS/Vue.js) for a supermarket chain operating across two countries.
- Government Meeting Management: Built a digital meeting management system for government agencies to handle agendas, minutes, and automated summary reports.

EDUCATION

Bachelor of Science in Information Technology
Naresuan University
08/2015 - 04/2019

Specialization: Website Developing
Thesis: "Hospital Ward Unit Web Application"
GPA: 3.44
